

Quizlet me!

Scenario:

Quizlet is an excellent set of free digital study platform that has both browser-based and app (Android and iOS) versions. It is predicated on the idea of a traditional flashcard that has a 'term' and an associated 'definition'. Used correctly, it can afford learning opportunities that allow it to be effectively and practically implemented in the classroom and at home with minimal technological fuss. **Quizlet needs** your team to market its product and make it more appealing to students your age!

Major Points to Emphasize

- Include one or more pictures of the product or students using the product, etc.
- Is there a cost for this product?
- Where can I use this product? Online? Mobile? Both?
- Which OS platforms can use the mobile app?
- How might this product benefit student learning?
- The ad should mention the website
- Convince the student how this product can be useful to their education.

Challenge:

- Using Adobe Premiere Pro CC or WeVideo, create a 30 second video ad
- Elaborate on the points above using voiceovers, text slides, etc..
- Use blank Storyboards need to show the sequence of the shots for the AD (optional)
- Video must have an Intro slide with the Product name and photo.
- Students can add video (student-created from computer cam) and/or pictures (or a combination of both) to be used in the project scenes.
- Include audio files provided (optional)
- Include voiceovers using headsets (optional)
- Video MUST be a maximum of 30 seconds.

Presenting to Judges:

- Teams will take turns presenting their videos to the judges as an exported MP4 or right from the application they used to create the video.

Time: Your team will have:

- 45 minutes to brainstorm, create your video, and export to MP4 (exporting optional-students may present from application).
- 2 minutes to present your video to the judges

Scoring: You will receive up to:

5pts – The Ad meets the time limit

5pts – Team collaboration during the planning stage.

5pts – Creativity of the presentation.

5pts – Incorporation of all team members into the presentation

5pts – Video contains the Intro slide with Product Name and image and the ad flow is well managed

5pts – The team addresses points effectively and persuasively using voiceovers, text slides, and/or live video

Tips:

As with most of the live challenges, teams will need to be very careful with time management. They should allocate at least a few minutes to review their video and prepare for the presentation to the judges.

- *This year, students can only use Adobe Premiere Pro CC or WeVideo.*

- IT will provide laptops as they always have containing Adobe Premiere Pro CC (2017) and of course students will also have access to use online video editors such as WeVideo.
 - Students that use We Video will need to know how to access the website and log in to We Video.
- Students will have the choice to use either of the above editing applications.
- Students may show their video without exporting the file to MP4 if they prefer. Note: If using WeVideo lower quality footage is used until it is exported and can cause the video to skip so for best results, we advise students to process their video for judge viewing.

Day of:

- Each Team will have an Event flash drive for each Video event they are participating, and each flash drive will contain the files necessary to complete the event. (For example: Team A is competing in the BB, Doc, and PSA, so there will be three flash drives for Team A, one for each event.)
- Flash drives will be placed in the rooms the students are assigned, thus, the importance of students having the most current schedule.
- **Students that leave without returning the flash drive will not receive points for the event.**
- **Student must stay outside the room, and if they leave the area before they present to judges, they will not receive points for the event.**
